INNOVATION THROUGH INFRASTRUCTURE

DEAN MACPHERSON
MINISTER OF PUBLIC WORKS & INFRASTRUCTURE

public works & infrastructure
Department:
Public Works and Infrastructure
REPUBLIC OF SOUTH AFRICA

It is with great pride that I present this post-event report on the Sustainable Infrastructure Development Symposium (SIDSSA), hosted by Infrastructure South Africa.

Over the course of this significant gathering, we witnessed a convergence of thought leaders, government officials, private sector partners, and international delegates, all committed to advancing South Africa's infrastructure agenda.

This symposium served as a vital platform for progress updates on the country's infrastructure pipeline, culminating in the launch of the second edition of the Construction Book, which now highlights over 250 projects valued at more than R268 billion – nearly double the previous edition's scope.

Additionally, the announcement of the top seven catalytic projects, supported by a pioneering R600 million fund for project preparation, marks a strategic move towards accelerating project implementation.

The event reinforced our collective resolve to transform infrastructure development from discourse into tangible action. While the symposium was a resounding success, it also underscored the importance of intensified efforts by both public and private sector stakeholders to attract further investment. Such collaboration is essential if we are to turn South Africa into a thriving construction site, stimulate economic growth, and generate employment opportunities across all communities.

As we reflect on these achievements, I remain optimistic about our journey ahead.

The partnerships forged and commitments made during SIDSSA will be instrumental in our ongoing efforts to deliver real, impactful results for South Africa. It is now imperative that we translate this momentum into concrete projects – putting shovels in the ground and cranes in the sky – to build a better, more resilient future for our nation.

I commend all those who contributed to the success of this symposium and look forward to the continued progress that will emerge from our collective dedication and action.

SIDSSA 2025: A NEW ERA FOR SOUTH AFRICA'S INFRASTRUCTURE

MAMEETSE MASEMOLA
HEAD: INFRASTRUCTURE SOUTH AFRICA

INFRASTRUCTURE South Africa

The **5th edition of SIDSSA** was a landmark event, uniting key stakeholders from 29 countries to reshape South Africa's infrastructure future. Infrastructure South Africa (ISA) has become a beacon of efficiency -- expediting approvals, resolving permits swiftly, and supporting strategic projects like Hazelmere Dam and the Redstone Solar Power Plant. We're backing 12 priority projects, including SEZs, water schemes, and energy initiatives like Eskom Tubatse, with over R600 million allocated for project readiness.

A PLATFORM FOR TRANSFORMATION

SIDSSA has become a crucial space for driving impactful infrastructure delivery. Underpinned by our commitment, the symposium showcased our nation's progress amid South Africa's hosting of the G20 summit. Leveraging this platform, we're addressing Africa's $100 billion annual infrastructure funding gap through innovative solutions such as blended finance and green bonds.

LEADING THE GLOBAL AGENDA

South Africa's leadership in the G20 Infrastructure Working Group is focused on reforming financing mechanisms – making blended finance more accessible and exploring new instruments to promote resilient, inclusive infrastructure across Africa.

A MOMENT OF PROMISE

President Cyril Ramaphosa's keynote reaffirmed that South Africa stands on the brink of an infrastructure renaissance – driven by strategic investments, innovative partnerships, and unwavering commitment. The symposium reflected this momentum, reaffirming infrastructure as the backbone of our growth.

DRIVING GROWTH AND INVESTMENT

Quality infrastructure attracts investment, cuts costs, and boosts competitiveness. With the AfCFTA opening a market of 1.3 billion, our interconnected networks position South Africa as a continental trade hub.

RECORD INVESTMENT AND FUTURE PLANS

ISA launched the second edition of the Construction Book, listing 250 projects valued at over R238 billion – shifting from planning to action. Looking ahead, infrastructure spend will surpass R1 trillion, supported by reforms to procurement, public-private partnerships, and project preparation – all facilitated by SIDSSA 2025.

REGIONAL COLLABORATION

The SIDSSA Leaders Forum reinforced our commitment to African cooperation. Bringing together infrastructure ministers, it fostered dialogue and policy alignment to unlock economies of scale, attract investment, and build resilient, interconnected networks across the continent.

A SHARED FUTURE

As we move forward, collaboration among public, private, and development partners is vital. SIDSSA 2025 demonstrates our collective dedication to building sustainable, inclusive, and future-ready infrastructure.

The journey to a prosperous South Africa and a stronger Africa is within our reach. Let's seize this moment, harness our strength, and leave a lasting legacy for generations to come.

TOGETHER, WE BUILD SOUTH AFRICA.

"Now is not the time for complacency — it is time to turn our words into action and truly make South Africa a country under construction. We must see shovels in the ground and cranes in the sky in communities across the country. And I have no doubt that we will achieve this goal through the partnerships forged at the symposium. By working together, we are building a better South Africa..."

Dean Macpherson, Minister, Public Works & Infrastructure

SITE VISIT
25 MAY 2025

"This is a clear example of infrastructure that grows the economy and delivers tangible results."

In the lead-up to the Sustainable Infrastructure Development Symposium South Africa (SIDSSA) 2025, a high-level delegation comprised of Minister of Public Works and Infrastructure, Dean Macpherson and Deputy Minister of Public Works and Infrastructure, Sihle Zikalala undertook an official visit to the Potsdam Wastewater Treatment Works. This facility is a Strategic Integrated Project (SIP) under the Infrastructure Development Act.

The delegation, which included MECs, senior government officials, and international counterparts from Eswatini, Lesotho, Namibia, and Uganda, aimed to highlight South Africa's advancements in delivering strategic, high-impact infrastructure aligned with both economic growth and social development objectives.

The visit focused on the R5.2 billion upgrade of the Potsdam Wastewater Treatment Plant, located in Milnerton and led by the City of Cape Town. Upon completion, this project is anticipated to become South Africa's largest wastewater treatment facility. Notably, the project is progressing ahead of schedule and within budget, exemplifying effective collaboration and project delivery, key principles promoted by Infrastructure South Africa (ISA) and SIDSSA.

Minister Macpherson emphasized that over R600 million has been allocated to prepare strategic infrastructure projects, covering basic services as well as catalytic investments in energy and water sectors. This underscores the government's commitment to accelerating infrastructure readiness across sectors.

The visit also served as an opportunity to showcase best practices in infrastructure planning and implementation. As a SIP, the Potsdam project benefits from ISA's facilitation in streamlining project approvals, stakeholder coordination, and reducing bureaucratic delays, thereby expediting infrastructure development.

DRIVING AFRICA'S INFRASTRUCTURE FUTURE:

KEY CONTENT AND PROGRAMME HIGHLIGHTS FROM SIDSSA 2025

The SIDSSA 2025 conference showcased a dynamic lineup of high-level discussions and strategic sessions aimed at advancing Africa's infrastructure development.

On 26 May, the Leaders Forum brought together ministers responsible for infrastructure, fostering regional cooperation and positioning South Africa as a key player in mega-project planning and financing. The G20 country sessions highlighted how global platforms influenced national priorities, catalysed investments, and promoted policy coherence, featuring distinguished speakers from China, the UK, Saudi Arabia, and Brazil. Key sessions covered digital infrastructure, resilient economic recovery, social infrastructure, and sustainable energy transitions, with expert moderators guiding the dialogues.

A significant highlight was the presentation of the second edition of the **Construction Book** and announcement the top seven infrastructure project priorities identified from Project Preparation bid submissions, designed to unlock economic opportunities through strategic project development.

During the plenary session, two key **Memoranda of Understanding (MOU's)** were signed: one between ISA and Meridiam, focused on mobilizing funding, supporting project preparation, and capacity building through the Africa Infrastructure Fellowship Programme; and another between ISA and Huawei, aimed at developing standard designs for public assets, pre-provisioning fibre infrastructure, and advancing digital transformation in infrastructure projects.

The conference culminated in an official opening plenary on 27 May, where strategic leadership emphasised promoting investable, sustainable projects.

Ministerial panels shared insights on policies, resource mobilization, and harmonizing efforts across sectors and borders to ensure inclusive, bankable infrastructure development across Africa.

The event concluded with the closing of the plenary and a face-to-face session with ministers, setting a clear agenda for regional collaboration, infrastructure investment, and innovative project preparation to accelerate economic growth across the continent.

STAKEHOLDER DINNER

The SIDSSA 2025 stakeholder dinner was held at the stunning Quoin Rock Wine Estate in Stellenbosch, offering an elegant and picturesque setting for attendees to connect and collaborate.

The evening was enhanced by superb entertainment from Mandisi Dyantyis, whose captivating performance added a vibrant touch to the event.

It was a memorable occasion that fostered meaningful discussions and strengthened partnerships amid the estate's breathtaking surroundings

SIGNIFICANT MILESTONES:
MEMORANDA OF UNDERSTANDING (MOU's)

25 MAY 2025

On 25 May 2025, during the SIDDSA Media Event, four MOU's were officially signed, marking significant collaborations across various sectors.

The first MOU with Brand South Africa aims to strengthen joint efforts in promoting South Africa's investment, tourism, and national pride. The partnership will focus on strategic activities to enhance the country's reputation, leverage joint marketing initiatives, and improve stakeholder engagement on key platforms.

The second MOU with the Gauteng Infrastructure Financing Agency (GIFA) formalizes collaboration on the province's bulk infrastructure development. This partnership supports the acceleration of critical infrastructure projects aligned with Gauteng's Employment Growth and Development Strategy.

The third agreement with the South African Council for the Project and Construction Management Professions (SACPCMP) facilitates cooperation to promote the SIDDSA event. It includes integrating SIDDSA content into SACPCMP's social media channels, publications like The Shape Shifter, and securing Continuing Professional Development (CPD) accreditation for SIDDSA.

The fourth MOU with the Infrastructure Technical Assistance Facility (ITAF) of the National Treasury establishes a partnership to provide technical and advisory support for infrastructure development projects. ITAF will also offer funding and resources to ensure the successful planning and execution of sustainable infrastructure initiatives in South Africa.

SIGNIFICANT MILESTONES:
MEMORANDA OF UNDERSTANDING (MOU's)

27 MAY 2025

During the SIDSSA Plenary Session on 27 May 2025, two MOU's were signed.

The first MOU with Meridiam SAS, an independent Benefit Corporation specializing in infrastructure development and management, aims to support Africa's infrastructure projects through its African Funds. The collaboration focuses on mobilizing funding, identifying candidates for the Africa Infrastructure Fellowship Programme to enhance capacity in South Africa's public sector, and sharing infrastructure data and lessons to improve project planning and execution. This partnership particularly supports ISA's Adopt-A-Municipality Pilot Programme.

The second MOU with Huawei Technologies Africa facilitates cooperation in expanding fibre infrastructure and digital transformation across South Africa. The agreement includes working with government departments on pre-provisioning fibre in public buildings, conducting research for network industry development, and demonstrating the benefits of fibre connectivity through proof-of-concept projects.

Additionally, Huawei will assist in hosting international experts and investors to foster infrastructure investments and knowledge exchange.

SIGNIFICANT MILESTONES:
CONSTRUCTION BOOK 2025/2026

The Construction Book 2025/26 was launched, featuring over 180 projects with a total value exceeding R268 billion. This publication aimed to serve as a transparent and reliable resource to stimulate investment and enhance project readiness across the continent.

Seven infrastructure priorities were identified for project preparation in 2025/2026, including the Boegoebaai Port and Rail Development in the Northern Cape, Project Alpha — a 300 MW gas-to-power project, the City of Ekurhuleni Wastewater Conveyance and Treatment Systems Regionalization, the COEGA 100 MW solar farm, the South Africa Water Reuse Program, the Regional Energy Infrastructure, Storage & Distribution Program, and the Gauteng Urban Upgrade Program in Johannesburg CBD.

These projects were selected for their readiness to move into implementation.

> ***"The second Construction Book is a landmark publication compiled by Infrastructure South Africa. [It] is a signal to investors that this government is coordinated and ready to deliver... "***
